

Achieve proactive security and enhance your resilience with Thor Foresight Enterprise

Proactive, next-gen security featuring EDR and HIPS capabilities to combat evolving threats and fully secure your organization.

The embedded **Darklayer GUARD™** is the EDR you need in this threatscape, bringing unique traffic-based malware blocking to prevent endpoint compromise and eliminate the risk of data exfiltration.

With the **X-Ploit Resilience module**, your organization gains the most powerful and flexible policy deployment tool, with: **automated vulnerability, patching - 3rd party software installation - essential intelligence reporting.**

Alongside the proprietary **VectorN Detection™**, with its behavioral analysis of endpoint traffic and **IOAs / IOCs**, your organization gains the essential threat hunting tools to actually anticipate attacks and map out the security-critical points in your environment.

Featuring automated vulnerability patching, **3rd party and Microsoft software installation** alongside essential intelligence reporting, X-Ploit Resilience brings everything in one place, with granular controls so you can act precisely.

Fully customizable and 100% compatible with existing solutions, Thor Foresight Enterprise provides unparalleled threat hunting and threat prevention to combat next-gen malware, ransomware and other enterprise threats.

Choose a flexible, cost-saving solution for patch and software deployment management.

Eliminate the vulnerabilities that can expose your valuable data.

Take your cyber resilience to the next level with the next-gen EDR solution

Multiple deployment tools create confusion, slow down your reaction time and open your enterprise to devastating malware and ransomware attacks.

99% OF EXPLOITED VULNERABILITIES

99% of the vulnerabilities exploited will be the ones known to security and IT professionals for at least a year.

- Gartner

Outdated software is the most common attack vector. It leaves your organization exposed and can result in ransomware infections or critical data leaks.

\$5 MILLION IN DAMAGE COSTS

\$5 million – the average cost of a single ransomware attack.

- Ponemon Institute

3,785 CORPORATE DATA BREACHES

In 2017, as recorded in The Internet Crime Complaint Center (IC3). On average, 10 data breaches happen daily.

- FBI

Vulnerability management should not be a game of whack-a-mole, nor the biggest time-sink in your workflows because of antiquated, opaque solutions.

Move beyond SCCM / WSUS and discover this unique threat prevention and policy deployment tool for an unrivaled control over your entire infrastructure.

X-Ploit Resilience: the next-gen, fully automated patching and software management solution.

Exercise true control over your environment and build true resilience in front of critical cyber threats like ransomware.

Leading product and intelligence

Appraised by the FBI, working with EUROPOL and USDOJ and endorsed by NC3
