

## Preventing the unknown and catching the known

Discover the ultimate, next-gen endpoint security suite: Thor Premium Enterprise.

Featuring both next-gen EDR and proactive, code-autonomous detection alongside impeccable, code-based detection, this powerful package contains the security layers critical to protect your organization in this threatscape.

### PREVENTION – MITIGATION – TRUE RESILIENCE

The award-winning, multi-layered security suite with next gen capabilities:

The embedded Darklayer GUARD™ is the endpoint detection and response (EDR) you need in this threatscape, bringing unique traffic-based malware blocking to prevent endpoint compromise and eliminate the risk of data exfiltration.

Alongside the proprietary VectorN Detection™, with its behavioral analysis of endpoint traffic and IOAs / IOCs, you gain the essential threat hunting tools to actually anticipate attacks and map out the security-critical points in your environment.

With the X-Ploit Resilience module, your organization can move beyond SCCM / WSUS with the most powerful, flexible and intuitive policy deployment tool.

You will be able to get an unrivaled overview and control over your software inventory and, at the same time, achieve preemptive vulnerability management.

Featuring automated vulnerability patching, 3rd party and Microsoft software installation alongside essential intelligence reporting, X-Ploit Resilience brings everything in one place, with granular controls so you can act precisely.

Thor Vigilance, the next-gen, cost-effective detection and remediation module from Heimdal Security, uses techniques known by both traditional and next-gen Antivirus engines to provide you with the essential security layer.

What makes this Antivirus truly unique is the unparalleled level of intelligence it uses for threat assessment.

Working in tandem, Darklayer GUARD™ and VectorN Detection™ supply it with indicators of attack, enhancing its local and cloud threat analysis capabilities.

With the Infinity Management module, Administrators within any organization also gain the unique ability to deploy custom, in-house software and patches that are not available in the X-Ploit Resilience catalogue.

**Thor Premium Enterprise offers the security layers vital to your organization, blending next-gen threat defense techniques with powerful software asset management that will easily integrate with your existing solutions.**

Multiple deployment tools create confusion, slow down your reaction time and open your Enterprise to devastating malware and ransomware attacks.

**99% OF EXPLOITED VULNERABILITIES**

99% of the vulnerabilities exploited will be the ones known to security and IT professionals for at least a year

- Gartner

Outdated software is the most common attack vector. It leaves your organization exposed and can result in ransomware infections or critical data leaks.

**\$5 MILLION IN DAMAGE COSTS**

\$5 million – the average cost of a single ransomware attack

- Ponemon Institute

**3,785 CORPORATE DATA BREACHES**

In 2017, as recorded in The Internet Crime Complaint Center (IC3). On average, 10 data breaches happen daily.

- FBI

Vulnerability management should not be a game of whack-a-mole, nor the biggest time-sink in your workflows because of antiquated, opaque solutions.

**Discover what it means to have true control over your environment and deploy the highest level of cyber resilience**

**Leading product and intelligence**

Appraised by the FBI, working with EUROPOL and USDOJ and endorsed by NC3

# HEIMDAL SECURITY

## Thor Premium Enterprise

**In 2017, companies spent an average of US\$2.4 million and US\$2 million to deal with malware and web-based attacks, respectively.**

These are costs to detect, recover, investigate and manage the incident response. Also covered are the costs that result in after-the-fact activities and efforts to reduce business disruption and the loss of customers. These costs do not include expenditures and investments made to sustain an organization's security posture or compliance with standards, policies and regulations.

-The Cost of Cyber Crime Study 2017, Ponemon Institute

### What is your expenditure compared to those figures?

The modular nature of Thor Premium Enterprise was designated Anti Malware Solution of the Year. You can deploy the entire package for essential, multilayered security, or you can pick the capabilities currently missing from your enterprise.

Add next-gen cyber resilience and threat prevention to your environment, regardless of your current setup.

| Features   | THOR FORESIGHT | THOR VIGILANCE | THOR PREMIUM       | REGULAR ANTIVIRUS | REGULAR FIREWALL |

\* Only some Antivirus

#### Modules:

- ✓ **EDR, code-autonomous protection and critical intelligence to prevent, not just mitigate threats.**  
Darklayer GUARD™, the unique threat communication filtering, and VectorN Detection™, the key advancement powered by machine learning for adaptive protection against 2<sup>nd</sup> generation malware, are key components of Thor Foresight, working together to provide code-autonomous protection against malware and detection along multiple attack vectors.
- ✓ **Impeccable, code-based detection and powerful mitigation.**  
Thor Vigilance, the next-gen Antivirus, features local signature and file-based scanning for both scheduled and on-demand scans, real-time scanning powered by machine learning detection, cloud-scanning and sandbox inspection to detect and block evolving threats, alongside heuristic and behavior-based scanning to detect code changes and trigger alerts for potentially malicious activity.
- ✓ **Vulnerability management and truly custom policy deployment.**  
X-Ploit Resilience allows your organization to see and manage its your software inventory and, at the same time, achieve preemptive vulnerability management. This scalable, flexible and intuitive tool can handle both Microsoft and 3rd party software on-the-fly, from anywhere in the world and according to any schedule.
- ✓ **Unrivaled control over your software catalog, with security at the forefront.**  
The Infinity Management module gives Administrators within any organization the unique ability to deploy custom, in-house software and patches that are not available in the X-Ploit Resilience catalogue.

**Your organization needs true cyber resilience against both known and unknown threats.**

**Get in touch today to discover award-winning endpoint security. Which Thor Premium Enterprise module fits you best?**
