

## Cyber threats are no longer the activity of rogue hackers.

### That is why you need true cyber resilience.

The **WannaCry ransomware** attack was the worst cyber incident in history, with 200,000 endpoints encrypted, across 150 countries, and damages of up to \$5 billion.

It changed the world, for the worse. And it changed how you should approach the security of your enterprise.

Rogue hackers stopped being the biggest threat a long time ago.

State-sponsored attacks deployed with a scorched-earth policy are now a major security concern, as your business can be caught in the crossfire.

### The biggest barrier to that?

"Lack of investment in new cybersecurity technologies, including artificial intelligence and machine learning," say 60% of IT professionals.

- Ponemon Institute

### Enter Thor Vigilance, the next-gen, cost-effective detection and remediation solution.

Discover how **Thor Vigilance Enterprise**, the next-gen antivirus with impeccable, machine-learning powered detection that can actually stop advanced persistent threats.

Combining the techniques known by both traditional and next-gen antivirus engines, **Thor Vigilance** is the endpoint detection and response tool that will become the backbone of your enterprise.

#### Consolidate your security setup, detect and mitigate even next-gen threats with:

- ✓ Impeccable detection and market leading mitigation
- ✓ Low impact local file/signature scanning
- ✓ Active registry change scanning
- ✓ Real-time cloud scanning with Machine Learning detection
- ✓ Sandbox and backdoor inspections for suspicious files
- ✓ Heuristic, Behavior engines for code change detection

From the makers of Thor Foresight Enterprise, the Best Anti Malware Solution of the Year, comes the next-gen antivirus with market leading detection rates.

Appraised by the FBI, working with EUROPOL and USDOJ and endorsed by NC3

Your organization needs true cyber resilience against both known and unknown threats.

# HEIMDAL SECURITY

## Thor Vigilance Enterprise

"The typical business or charity is likely to only experience a handful of breaches in the space of a year, but that a minority experience hundreds of breaches or attacks in this timeframe – particularly the larger organizations."  
- Cyber Security Breaches Survey 2018 by Department for Digital, Culture, Media & Sport, Ipsos MORI Social Research Institute and University of Portsmouth.

### Local File/Signature & Registry scanning

Using real-time low-impact in-memory file and signature scanning, alongside active registry change scanning, Thor Vigilance Enterprise provides the leading edge, code-based detection and mitigation.

### Sandbox and Backdoor Inspection

Every file in your organization should be impeccable, just like Thor Vigilance Enterprise's detection rate.

If scanned files do not appear as malware, they will be isolated in our sandboxing system and examined for malicious behavior. If they try to contact Command and Control servers, that malicious communication will be stopped at its roots.

### Real-time Cloud Scanning

Any unknown file and potential threat found will be sent to our cloud for extra scanning. Through 1.000 CPU cores using enhanced machine learning detection algorithms, detection gains a new dimension.

### Process and Behavior-Based Scanning

This next-gen Antivirus has the ability to detect code changes at all levels.

Once files start to execute, Thor Vigilance will monitor processes and process chances with Heuristic, behavior-based engines powered by AI.

Thor Vigilance Enterprise combines the techniques known by both traditional and next-gen Antivirus to detect and remediate viruses, APTs, financial fraud, ransomware and data leaks.

### Consolidate your security setup, detect and mitigate even next-gen threats.

Offering an effective overview of threats and advanced remote remediation features in a single interface, Thor Vigilance Enterprise enables you to remotely execute tasks such as:

- ✓ Differentiated Group Policy settings
- ✓ Scheduling of scans per group
- ✓ Remote quick scan and full scan per device or per group
- ✓ Scan exclusions
- ✓ Quarantine of selected processes

Thor Vigilance leads the field in malware detection testing on its own.

When supplied with the Thor Foresight IOA/IOC intelligence, it gains the unique ability to mitigate otherwise hidden threats and provides essential EDR for impeccable, multi-layered security.

Discover the award winning Heimdal Security products to add true cyber resilience to your organization.
